Applied Math for Wastewater Plant Operators Set

By Price, Joanne K.

CRC Press, 2000. Book Condition: New. Brand New, Unread Copy in Perfect Condition. A+ Customer Service! Summary: This two-volume set-textbook plus workbook-provides a complete guide to the calculations required for water treatment. It covers all the fundamental math concepts and skills needed for daily water/wastewater treatment plant operations. The text includes complete self-teaching guides for all water/wastewater treatment calculations, skill checks, and hundreds of worked examples and practice problems, with calculations summarized in each chapter. Topics covered include volume, flow and velocity, milligrams per liter to pounds per day, loading rate, detention and retention times, efficiency pumping, water sources and storage, coagulation and flocculation, sedimentation, filtration, chlorination, fluoridation, and softening.
