RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 56 pages. Original publisher: Emmitsburg, Md. : Federal Emergency Management Agency, U. S. Fire Administration, National Fire Data Center, 2003. OCLC Number: (OCoLC)52353983 Subject: Command and control at fires. Excerpt: . . . USFA-TR-123 March 2003 3 The USFA report, Firefighter Fatalities Retrospective Study, analyzed incident data on firefighter fatalities between 1990 and 2000. According to this report, the leading nature of fatal injuries to firefighters is heart attack ( about 44 percent ). Trauma, including internal and head injuries, is the second leading type of fatal injury ( 27 percent ). Twenty percent of fatalities are the result of asphyxia and burns. Firefighters under the age of 35 are more likely to be killed on duty by traumatic injuries and burns than from medical causes such as heart attack or stroke. Figure 1 and 2 provide more detailed information about both the nature and cause of fatal firefighter injuries. While the majority of the firefighters who died ( 57 percent ) were members of volunteer or combination departments, career personnel were killed at a rate disproportionate to their numbers in the fire service. Full-time career personnel accounted...

### Reviews

*This is the best pdf i actually have read till now. It typically fails to charge too much. Your life period will probably be transform the instant you total reading this publication.*

-- **Dr. Don Morissette V**

*This publication will not be simple to get started on looking at but quite entertaining to learn. It generally fails to cost an excessive amount of. You will not feel monotony at anytime of your time (that's what catalogues are for about if you ask me).*

-- **Bettie Gutmann**
